Section A: Faculty Section

1. General provisions

Article 1.1 Applicability of the Regulations

1. These Regulations apply to anyone enrolled for the programme, irrespective of the academic year in which the student was first enrolled for the programme. These Regulations apply to the teaching and examinations for the following Master’s degree programmes:

- Artificial Intelligence
- Bioinformatics and System Biology
- Biomedical Sciences
- Biomolecular Sciences
- Business Analytics
- Computer Science
- Drug Discovery and Safety
- Earth Sciences
- Ecology
- Environment and Resource Management
- Global Health (research)
- Health Sciences
- Hydrology
- Information Sciences
- Management, Policy Analysis and Entrepreneurship in the Health and Life Sciences
- Mathematics
- Medical Natural Sciences
- Neurosciences (research)
- Parallel and Distributed Computer Systems
- Science Business and Innovation
- Stochastics and Financial Mathematics

2. These Regulations enter into force with effect from 1 September 2019.

3. An amendment to the Teaching and Examination Regulations is only permitted to concern an academic year already in progress if this does not demonstrably damage the interests of students.

Article 1.2 Definitions

The following definitions are used in these Regulations (in alphabetical order):

a. academic year: the period beginning on 1 September and ending on 31 August of the following calendar year;

b. CvB: the Executive Board of Vrije Universiteit Amsterdam.

c. Double degree programme: joint programme in the context of cooperation between Vrije Universiteit Amsterdam and the educational institution within and outside the EU, as to gain a double university degree; of the VU and the educational institution concerned; though not being the same as a ‘joint degree programme’ according to the art. 7.3c WHW’;

d. EC (European Credit): an EC credit with a workload of 28 hours of study;

e. educational component: a unit of study of the programme within the meaning of the WHW;

f. examination: the final examination of the Master’s programme;

g. exemption: Exemption from an examination/ practical/ fieldwork based on an earlier successfully completed examination, or knowledge / skills of a similar content, level and scope gained outside higher education;

h. FGV: Faculty joint assembly – assembly of the faculty student council and faculty staff
i. interim examination: an assessment of the student’s knowledge, understanding and skills relating to a course component. The assessment is expressed in terms of a final mark. An interim examination may consist of one or more partial examinations. A resit always covers the same material as the original interim examination;

j. joint degree: a degree awarded by an institution together with one or more institutions in the Netherlands or abroad, after the student has completed a study programme (a degree programme, a major or a specific curriculum within a degree programme) for which the collaborating institutions are jointly responsible;

k. OLC: programme committee;

l. period: a part of a semester;

m. practical exercise: the participation in a practical training or other educational learning activity, aimed at acquiring certain (academic) skills. Examples of practical exercises are:
   - researching and writing a thesis or dissertation
   - carrying out a research assignment
   - taking part in fieldwork or an excursion
   - taking part in another educational learning activity aimed at acquiring specific skills, or
   - participating in and completing a work placement;

n. premaster student those who enroll in a premaster programme;

o. Programme: the totality and cohesion of the course components, teaching activities/methods, contact hours, testing and examination methods and recommended literature;

p. SAP/SLM: the student information system (Student Lifecycle Management);

q. semester: the first (September - January) or second half (February - August) of an academic year;

r. study guide: the guide for the study programme that provides further details of the courses, provisions and other information specific to that programme. The Study Guide is available electronically at: https://www.vu.nl/studiegids

s. subject see ‘educational component’;

t. substituting course/educational component see under d (double degree programme). A course obtained at the educational institute, within the context of cooperation, that is mentioned in the diploma supplement as such; not being an ‘exemption’.

u. thesis/ internship work placement a component comprising research into the literature and/or contributing to scientific research, always resulting in a written report;

v. university: Vrije Universiteit Amsterdam;

w. WHW: the Dutch Higher Education and Research Act (Wet op het Hoger Onderwijs en Wetenschappelijk Onderzoek);

x. workload: the workload of the unit of study to which an interim examination applies, expressed in terms of credits = EC credits (ECTS = European Credit and Transfer Accumulation System). The workload for 1 year (1,680 hours) is 60 EC credits.

The other terms have the meanings ascribed to them by the WHW.

2. Study programme structure

Article 2.1 Structure of academic year and educational components

1. The study programme will be offered in a year divided into two semesters.

2. Every semester consists of three consecutive periods of eight, eight and four weeks.

3. An educational component comprises 6 EC or a multiple thereof.
### Article 2.2 Refusal or termination of registration / (judicium abeundi)

1. Pursuant to the provisions of Article 7.42a of the Act, the Faculty Board or the Examination Board may, in exceptional circumstances, request the Executive Board to terminate or refuse a student’s registration on a programme. This may be the case if the student’s conduct or statements demonstrate his or her unsuitability to work in the relevant field or discipline, or to take part in the programme’s practical training component.

2. If a student is suspected of being unsuitable as described in paragraph 1, the Examination Board or the Faculty Board will examine the case, and the student will be informed of this immediately. The Examination Board or the Faculty Board will only issue a recommendation after careful consideration of the interests involved and following a hearing with the student concerned.

### Article 3. Assessment and Examination

#### Article 3.1 Signing up for education and interim examinations

1. Every student must sign up to participate in the educational components of the programme, the examinations and resits. The procedure for signing up is described in an annex to the Student Charter.

2. Signing up may only take place in the designated periods.

3. If a student does not pass the examination and the resit of a component, he/ she is obliged to take the whole component again. This rule does not apply to practical exercises and programmes that make use of component marks that retain their validity. For further regulations see Section B of the programme involved.

#### Article 3.2 Type of examination

1. At the student’s request, the Examination Board may permit a different form of interim examination than that stipulated in the course catalogue. If applicable, more detailed regulations on this are included in the Rules and Guidelines for the Examination Board.

2. In an educational component is no longer offered in the academic year following its termination, at least one opportunity will be provided to sit the interim examination(s) or parts thereof and a transitional arrangement will be included in the programme-specific section for the subsequent period.

#### Article 3.3 Oral interim examinations

1. An oral assessment is public unless the Examinations Board on request determines otherwise.

2. An oral examination will be taken in the presence of a second examiner.

#### Article 3.4 Determining and announcing results

1. The examiner determines the result of a written interim examination as soon as possible, but at the latest within fifteen working days. By way of departure from that stipulated in the first clause, the marking deadline for theses, internships / work placements and final assignments is no longer than twenty working days. The examiner will then immediately ensure that the marks are registered and also ensures that the student is immediately notified of the mark, taking due account of the applicable confidentiality standards.
2. a. The examiner determines the result (i.e. mark) of an oral examination as soon as possible, though within one working day, after the examination has finished and informs the student accordingly. The third clause of the first paragraph applies.  
b. The examiner determines the result of an interim examination no later than five working days before the next (interim) examination will be held.

3. In the case of alternative forms of oral or written examinations, the Examination Board determines in advance how and by what deadline the student will be informed of the results.

4. A student can submit a request for reassessment to the examiner. A request for reassessment does not affect the time period for lodging an appeal.

5. Together with the result of an examination, the student’s attention will also be drawn to their right to inspect the assessed work and have a post-examination discussion as stipulated in Art. 3.9, as well as his/her option to lodge a complaint before the Examination Board, and if necessary, to appeal to the Examinations Appeals Board (in Dutch: COBEX).

---

**Article 3.5 Examination opportunities**

1. a. Per academic year, two opportunities to take examinations per educational component will be offered.
   b. The options for retaking practical components, work placements and theses are detailed in the relevant work placement manual, teaching regulations or graduation regulations.

2. The most recent mark will apply in the event of a resit. A retake is allowed for both passed and failed units of study.

3. The resit for a (partial) interim examination must not take place within ten working days of the announcement of the result of the (partial) examination being resat.

4. The Examination Board may allow a student an extra opportunity to sit an examination if that student:
   a) is lacking only those credits to qualify for his or her degree;
   b) has failed the examination during all the previously offered attempts, unless participation in an examination was not possible for compelling reasons.

The extra opportunity can only be offered if it concerns a written examination, a paper or a take home examination. This provision excludes the practical assignments and the Master’s thesis. Requests for an additional examination opportunity must be submitted to the Examination Board no later than 15 July. If necessary, the method of examination may deviate from the provisions in the study guide.

---

**Article 3.6 Marks**

1. Marks are given on a scale from 1 to 10 with no more than one decimal point.

2. The final marks are given in whole or half points.

3. Final marks between 5 and 6 will be rounded off to whole marks: up to 5.5 rounded down; from 5.5 rounded up. To pass a course, a 6 or higher is required.

In case the examination of a component consists of two or more parts, each of which are graded separately, the (weighted) mean of these marks (meaning: the final mark) must be rounded off using the following table:

<table>
<thead>
<tr>
<th>From</th>
<th>Up to</th>
<th>Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>1,00</td>
<td>1,25</td>
<td>1</td>
</tr>
<tr>
<td>1,25</td>
<td>1,75</td>
<td>1,5</td>
</tr>
<tr>
<td>1,75</td>
<td>2,25</td>
<td>2,0</td>
</tr>
<tr>
<td>2,25</td>
<td>2,75</td>
<td>2,5</td>
</tr>
</tbody>
</table>

---

*Ordinance CvB, see appendix 3*
4. The Examination Board can allow to use symbols rather than numbers, such as: pass, fail, (un)satisfactory, good, VRS (exemption). In case a student does not take part in any (interim) examination, the examiner will register the mark 'ns' (c.q. no show).

Article 3.7 Exemption

1. At the written request of the student, the Examination Board may exempt the student from taking one or more examination components, if the student:
   a) has passed a course component of a university or higher professional education programme that is equivalent in terms of content and level;
   b) has demonstrated through his/her work and/or professional experience that he/she has sufficient knowledge and skills with regard to the relevant course component.

   The Examination Board will make a decision within six weeks after receiving the request.

2. The Master’s thesis, the final work placement (c.q. internship) and the final project (c.q. final paper) are excluded from this exemption possibility.

3. A maximum of 18 EC for a one one-year master programme and 36 EC for a one two-year master programme can be accumulated through granted exemption. The substituting courses (educational components) are not included.

Article 3.8 Validity period for results

1. The validity period of interim examinations passed and exemption from interim examinations is unlimited, unless otherwise specified in Section B.

2. The validity period of a partial examination is limited to the academic year in which it was sat or until the end of the unit of study concerned, as stipulated for the relevant unit of study in Section B.

Article 3.9 Right of inspection and post-examination discussion

1. For twenty working days after the announcement of the results of a written interim examination, the student can, on request, inspect his or her assessed work, the questions and assignments set in it, as well as the standards applied for marking. The place and time referred to in the previous clause will be announced at the time of the interim examination on VUnet or Canvas.

2. If a collective post-examination discussion has been organized, individual post-examination discussions will be held only if the student has attended the collective
3. Students who meet the requirements stipulated in paragraph 1 can submit a request for an individual post-examination discussion to the relevant examiner. The discussion shall take place at a time and location to be determined by the examiner.

### Article 3.10 Fraud and plagiarism

1. The provisions of the Rules and Guidelines for the Examination Board apply in full.
   
   Ordinance CvB

2. Electronic detection software programmes may be used to detect plagiarism in texts. In submitting a text, the student implicitly consents to the text being saved in the database of the detection programme concerned.

   Ordinance CvB

### 4. Academic student counselling and study progress

#### Article 4.1 Administration of study progress and academic student counselling

1. The faculty board is responsible for the correct registration of the students’ study results. After the assessment of an educational component has been registered, every student has the right to inspect the result for that component and also has a list of the results achieved at his or her disposal in VUnet.

   Advice OLC; approval FGV (7.13 u)

2. Enrolled students are eligible for academic student counselling. Academic student counselling is in any case provided by:
   
a. The Student General Counselling Service
   b. Student psychologists
   c. Faculty academic advisors

   Advice OLC; approval FGV (7.13 u)

#### Article 4.2 Adaptations for students with a disability

1. A student with a disability can, at the moment of submission to VUnet, or at a later instance, submit a request to qualify for special adaptations with regard to teaching, practical training and interim examinations. These adaptations will accommodate the student’s individual disability as much as possible, but may not alter the quality or degree of difficulty of a unit of study or an examination. In all cases, the student must fulfil the exit qualifications for the study programme.

   Advice OLC; approval FGV (7.13 m)

2. The request referred to in the first paragraph must be accompanied by a statement from a doctor or psychologist. If possible, an estimate should be given of the potential impact on the student’s study progress. In case of a chronic disability a single (one time) request suffices.

   Advice OLC; approval FGV (7.13 m)

3. Students who have been diagnosed with dyslexia must provide a statement from a BIG, NIP or NVO registered professional who is qualified to conduct psychological evaluation.

   Advice OLC; approval FGV (7.13 m)

4. The faculty board, or on behalf of the faculty board, the educational director, or the programme director, decides on the adaptations concerning the teaching facilities and logistics. The Examination Board will rule on requests for adaptations with regard to examinations.

   Advice OLC; approval FGV (7.13 m)

5. In the event of a positive decision in response to a request as referred to in paragraph 1, the student will make an appointment with the study adviser to discuss the details of the provisions.

   Advice OLC; approval FGV (7.13 m)

6. A request for adaptations will be refused if it would place a disproportionate burden on the organization or the resources of the faculty or university were it upheld.

   Advice OLC; approval FGV (7.13 m)

7. If the disability justifies an extension of the interim examination time, the Examination Board will grant permission testifying to this entitlement to an extension. If a disability justifies other measures to be taken, the Examination Board will advise the Faculty Board on the necessary measures to be taken.

   Advice OLC; approval FGV (7.13 m)

8. The decision as referred to in paragraph 7, is valid for a maximum period of one year with...
the exception for the chronic diseases and disabilities.

5. Hardship clause

Article 5.1 Hardship clause

In instances not regulated by the Teaching and Examination Regulations or in the event of demonstrable extreme unreasonableness and unfairness, the faculty board responsible for the study programme will decide, unless the matter concerned is the responsibility of the Examinations Board.

Article 5.2. Publication

1. The faculty board will ensure the appropriate publication of these Regulations and any amendments to them.

2. The Teaching and Examination Regulations will be posted in the study guide or on VUnet.

Approved by authorized representative advisory body FGOV of the Faculty of Science on 3 September 2019.

Adopted by the Faculty Board on 30 August 2019.
Section B1: Programme specific – general provisions

6. General programme information and characteristics

Article 6.1 Study programme information

1. The programmes:
▪ Bioinformatics and System Biology, CROHO number 65020;
▪ Bioinformatics, CROHO number 60106;
▪ Life Sciences, CROHO number 60225
are offered on a full-time basis.

2. The language of instruction is English.

3. The programme Bioinformatics and System Biology, CROHO number 65020, is offered in partnership with the University of Amsterdam and leads to a joint degree.

Article 6.2 Teaching formats used and modes of assessment

1. The programme uses the teaching formats as specified in the study guide.

2. The modes of assessment used per educational component are specified in the study guide.

Article 6.3 Academic student counselling

The programme offers the following counselling in addition to the student counselling mentioned in Section A: within the first two months, each student is assigned a mentor. A Personal Education Plan is written in consultation with the mentor. The mentor will also typically act as the examiner on the MSc thesis of the student.

7. Further admission requirements

Article 7.1 Intake date(s)

1. The programme starts on September 1.

Article 7.2 Admission requirements

1. Admission to the Master's programme is possible for an applicant who has obtained a Bachelor’s degree obtained at an institution of academic higher education, which demonstrates the following knowledge, understanding and skills:
   a. Knowledge of: Molecular Cell Biology; Algorithms; Statistics; Calculus and Linear Algebra;
   b. Understanding of: Molecular Cell Biology; Algorithms; Statistics; Calculus and Linear Algebra;

2. The Admissions Board will investigate whether the applicant meets the admission requirements.
3. In addition to the requirements referred to in the first paragraph, the Admissions Board can also assess requests for admission in terms of (at least two of) the following criteria:
   a. talent and motivation;
   b. level of relevant knowledge and understanding;
   c. proficiency in methods and techniques;
   d. academic attitude and critical thinking;
   e. proficiency in the language(s) of instruction.

4. A student who has obtained a Bachelor’s degree in Biology, Biomedical Sciences, (Bio/Medicinal) Chemistry, Computer Sciences, Engineering, Health Sciences, (Bio)Informatics, Mathematics, Medical (Natural) Sciences, Medicine, Pharmaceutical Sciences or Physics from the University of Amsterdam (UvA) or from the Vrije Universiteit Amsterdam (VU) and candidates possessing a BSc degree equivalent to these programmes may enter the programme provided that the student possesses the knowledge, understanding and skills specified in paragraph 7.2.1. If the student is yet to acquire (part of) the knowledge, understanding or skills mentioned above, they need to acquire this in the first two months after the start of the programme; in this case the admission of the student will also depend on the criteria mentioned in paragraph 7.2.3 above.

### Article 7.3 Pre-Master’s programme

1. a) Students with a Bachelor's degree of a university of applied science (HBO) in a field that corresponds to a sufficient extent with the subject area covered by the Master's programme can request admission to the pre-Master’s programme.

   b) Students with a Bachelor's degree from an institution of academic higher education in a field that does not sufficiently corresponds with the subject area covered by the Master's programme can request admission to the pre-Master’s programme.

2. The pre-Master’s programme comprises 30 EC and is made up of the following units of study which are defined in the BSc minor “Bioinformatics and Systems Biology” at the Vrije Universiteit Amsterdam.

<table>

**Minor BSB courses depending on which background the applicant has**
### 8. Interim examinations and results

**Article 8.1 Sequence of interim examinations**

1. Students may participate in interim examinations [or practical exercises] of the components below only if they have passed the interim examination or examinations for the components mentioned hereinafter:
   - “Minor research project” after passing all “compulsory taught courses”, as defined in article 10;
   - “Major research project” after passing all “compulsory taught courses” and all “taught specialization courses”, as defined in article 10.
   - “Literature thesis writing” after passing all “compulsory taught courses”, as defined in article 10.

**Article 8.2 Validity period for results**

1. See Article 3.8 of the Teaching and Examination Regulations, section A. No further specific provisions.

2. A student may request the Examination Board to extend the validity of an exam. If the exam shows that a student’s knowledge is insufficient or outdated, or if the student’s skills and insights evaluated in the exam are demonstrably outdated, the Examination Board may impose a supplementary examination, impose a replacement examination or refuse to extend the period of validity.

3. In situations where a limited period of validity applies, the period of validity of examinations may be extended in the event of extenuating circumstances as stipulated in WHW Article 7.51, paragraph 2, with at least the period of allocated financial assistance specified in WHW Article 7.15, paragraph 1.
Article 8.3 Maximum Exemption(s)

A maximum of 36 EC of the curriculum can be accumulated through granted exemptions, based on previous results within other master’s programmes.

Advice OLC, approval FGV (7.13 par. 2, under r jo art. 9.38 sub b)

Article 8.4 Degree

Degree Students who have successfully completed their Master’s final Examination are awarded a Master of Science degree (MSc). The degree awarded is stated on the diploma. If it is a joint degree, this will also be stated on the diploma. Specialization name will be stated on the diploma, as either “Bioinformatics”, and/or “Systems Biology” if the student has successfully completed all the taught courses specific to the specialization (profile).

Legal provision, WHW
## Section B2: Programme specific – content of programme

### 9. Programme objectives, specializations and exit qualifications

#### Article 9.1 Workload

| 1. | The programme has a workload of 120 EC | Advice OLC; (7.13 a) |

#### Article 9.2 Specializations

The programme has the following specializations:
- Bioinformatics
- Systems Biology

One of the available specializations must be chosen. In case of a ‘free programme’ in bioinformatics and systems biology, prior approval of the examinations board must be obtained by the student.

|  | Advice OLC; (7.13 a) |

#### Article 9.3 Programme objective

The programme aims at providing students with sufficient knowledge, understanding and skills to “translate” biomolecular problems into models or computational methods, provide enough “focus” to understand and perform current research in Bioinformatics and/or Systems Biology, and provide enough “balance” such that all skills and knowledge required for this are obtained during the programme.

This results in the following objectives:
- teaching students to conduct empirical research to develop their practical skills, knowledge and insights into bioinformatics and/or systems biology (focus);
- enabling students to perform research in various application fields of bioinformatics and/or systems biology (balance);
- teaching key techniques and formalisms (focus), while providing sufficient options for differentiation (balance);
- teaching the technical skills of programming and modelling, all applied to problems in molecular biology and genomics (translation);
- providing a student-oriented education that is of high, internationally recognized quality (focus);
- providing a feasible study programme to a heterogeneously composed student population in an inspiring academic learning environment of two universities (balance).
Article 9.4 Exit qualifications

1. At all events, a graduate of the study programme will have acquired the following knowledge, understanding and skills. Note that the associated Dublin descriptors in indicated between square brackets, and that these are organized according to “translation”, “focus” and “balance”.

Focus & balance:
- both a solid academic basic as well as specialist knowledge and understanding in the field of bioinformatics and systems biology and in one or more sub-areas of bioinformatics and systems biology, and related fields such as biophysics, biochemistry, mathematic modelling and cell biology [Knowledge and understanding];
- the ability to independently set up and implement experiments contributing to a line of research [Applying of knowledge and understanding, Learning skills];
- the skills to analyze and interpret biological patterns and processes in both a qualitative and quantitative sense and make inferences based on these scientific results [Applying knowledge and understanding];

Focus:
- acquired profound knowledge, insight and practical experience in at least one specialist area of bioinformatics or systems biology [Knowledge and understanding, Applying knowledge and understanding];
- knowledge and understanding of the iterative process i.e. the relation between model, experiment and reality, of systems biology [Knowledge and understanding, Making judgements];

Translate:
- the ability to access and use international professional literature and master current scientific research developments and has knowledge of current scientific developments within relevant subdomains of bioinformatics and systems biology [Knowledge and understanding];
- the ability to get acquainted with a field of study and acquire specialist knowledge, understanding and skills in a short period of time [Making judgements];
- insight of the applications of bioinformatics and systems biology in general and specific specializations in particular and is able to apply this knowledge in new and continuously changing practical situations, also in broader, multidisciplinary contexts [Applying knowledge and understanding];
- capability of writing research or project proposals on the basis of realistic problem descriptions or to write a critical essay based on literature within a specialized field of study and one’s opinion [Knowledge and understanding, Applying knowledge and understanding, Making judgements];

Focus & Translate:
- the skills to present research projects and results both orally and written in English, at various scales and levels of abstraction, and communicate these to specialist and non-specialist audiences [Communication];

• an attitude that enables critical reflection and discussion [Making judgements, Learning skills];

**Balance & Translate:**
• the ability to successfully fulfill a position in society requiring an academic qualification as an independently operating professional that has a good knowledge base and attitude towards a biological approach to relevant societal issues [Learning skills];
• the ability to continue his/her career either as a researcher able to pursue a PhD degree at the best universities, as a scientist in research institutes worldwide, or as a research-skilled professional in organizations of government, civil society or business and industry [Applying knowledge and understanding, Making judgements].

2. Without prejudice to the provisions of paragraph 9.4.1, a graduate of the specialization **Bioinformatics** will have the knowledge and understanding in the field of Computational Biology, Bioinformatics and Data Science

3. Without prejudice to the provisions of paragraph 9.4.1, a graduate of the Specialization **Systems Biology** will have the following knowledge and understanding in the field of Computational Biology, Systems Biology, and Quantitative Biology.

4. Without prejudice to the provisions of paragraph 9.4.1, a graduate who has chosen to do the **minor Tesla** as mentioned in article 10.3.3, obtains the exit qualifications as listed.

5. Language proficiency is taken into account in the assessment of (interim) examinations

---

### 10. Curriculum structure

#### Article 10.1 Composition of the programme

1. The programme comprises at least a package of compulsory components and an individual Master’s thesis or academic internship.

2. The programme offers:
   - “Compulsory taught courses” comprising 18 EC;
   - “Taught specialization courses” that are specific to the specialization comprising 18 EC. Students need to choose at least one specialization;
   - Optional courses comprising 18 EC (in case only a single specialization is chosen);
   - A compulsory course to review literature comprising 6 EC;
   - A total of 60 EC in academic internships in the form of a minor and major research project, whereby the major research project comprises of at least 30 EC and should be within the field of the chosen specialization;
   - A student may be required to follow “conversion courses”, such courses will be approved by the mentor. No more than 6 EC of such BSc level courses can count towards the 18 EC of optional courses.

3. Educational components are categorized as specialized (400), research oriented (500) and highly specialized (600) level.
Article 10.2 Compulsory educational components
A detailed description per educational component can be found in the Study Guide.

### Basic Models of Biological Networks
- **Code**: X_418154 (VU)
- **EC**: 6
- **Points**: 500

### Statistics with R
- **Code**: X_418156 (VU)
- **EC**: 6
- **Points**: 400

### Advanced Modeling in Systems Biology
- **Code**: X_418155 (VU)
- **EC**: 6
- **Points**: 500

### Signal Transduction in Health and Disease
- **Code**: X_432535 (VU)
- **EC**: 6
- **Points**: 600

### Machine Learning
- **Code**: X_400108 (VU)
- **EC**: 6
- **Points**: 500

### Machine Learning for the Quantified Self
- **Code**: XM_40012 (VU)
- **EC**: 6
- **Points**: 400

---

2. If the student wishes to take a different educational component than listed, advance permission must be obtained in writing from the Examinations Board. (7.13 a)

3. The student can choose to participate in the minor Tesla, offered at the UvA, as part of the master programme.
   a. The Minor Tesla consists of 30 EC. The minor must be combined with a research programme, comprising at least 90 EC of the general compulsory components (courses, research project and literature study) in order to meet the general requirements of the programme. The minor consist of a course component and a project-based component. This project-based component has to be supervised by a Faculty examiner and is subject to prior approval of the Examinations Board. Because it is a multidisciplinary minor, an examiner from the research programme has to be appointed as a second assessor. Further information on this minor can be found at http://www.student.uva.nl.
   b. Students have to go through a separate intake procedure for admission to the minor Tesla;
   c. Students first have to finish at least 60 EC of the compulsory part of the programme (60 EC) before starting the minor;
   d. It is not permitted to take the obligatory research part of the programme and the minor simultaneously;
   e. The minor Tesla will replace the Second Research Project (Minor Research Project M BSB / XM_0072) for 30 EC;
   f. The student can participate in the minor Tesla without prior approval of the Examinations Board when following the programme as described here;
   g. It is not permitted to participate in both iGEM project and minor Tesla during the Master’s programme.

---

### Article 10.4 Practical exercise

Not applicable.

### Article 10.5 Participation in practical training and tutorials

In the case of a practical training, the student must attend at least 80% of the practical sessions. Should the student attend less than 80%, he or she must repeat the practical training, or the Examinations Board may have one or more supplementary assignments issued. (7.13 d)

### Article 11.1 Evaluation of the education

The education provided in this programme is evaluated in accordance with the (attached) evaluation plan. The faculty evaluation plan offers the framework. (7.13 a1)

### Article 11.2 Transitional provisions

By way of departure from the Teaching and Examination Regulations currently in force, the following transitional provisions apply for students who started the programme under a previous set of Teaching and Examination Regulations: article is not applicable. (7.13 a)

---

**Article 11.2 Transitional provisions**

By way of departure from the Teaching and Examination Regulations currently in force, the following transitional provisions apply for students who started the programme under a previous set of Teaching and Examination Regulations: article is not applicable. (7.13 a)
Advice and approval by the Programme Committee of Bioinformatics and Systems Biology, on 15 July 2019.

Approved by the Faculty Joint Assembly, on 3 September 2019.

Adopted by the board of the Faculty of Science 30 August 2019.
### Appendix I  Overview of articles that must be included in the OER

*Based on Section 7.13, paragraph 2, of the WHW and other Sections of the Act.*

Section B1: Programme specific – general provisions

<table>
<thead>
<tr>
<th>Article</th>
<th>Description</th>
<th>Section 7.13 paragraph 2 sub</th>
</tr>
</thead>
<tbody>
